

Short Range Distance Sensors (Displacement) OD Max

OD350-100T1

Nazwa modelu > **OD350-100T1**

Numer części > **6028957**

At a glance

- Several measurement ranges from 24 ... 26 mm up to 250 ... 450 mm
- CMOS receiving element for measurement independent of surface
- High measurement accuracy and frequency
- Variety of selectable integrated calculations based on values from two sensors
- Safe, laser technology for precise measurement or detection of very small objects
- Several analog and switching output options

Your benefits

- Minimum machine downtime due to its reliability on any surface, regardless of gloss or color
- Highly accurate measurement, even during the production process, ensures high product quality
- High measuring frequency of 10 kHz increases processing speeds and reduces cycle times
- Reduce the cost to change your process by making a reference measurement using two sensors
- Comparatively low investment costs for challenging measuring tasks
- An easy-to-read LC display and simple push-button keypad programming ensures simple setup and servicing
- Reduced material costs, when using the distance sensors to control cost-relevant production processes
