WORLD-BEAM® QS18E Series

Family of Expert™ Sensors in a Compact Universal Housing

Features

- Easy-to-use *Expert*-style Static and Dynamic TEACH options, plus Window, Light, and Dark SET, via push button or remote input
- Smart power-control algorithm to maximize performance in low-contrast applications
- Easy push-button or remote sensor setup options:
 - Dark-Operate/Light-Operate select
 - Selectable 30 ms output OFF-delay
- Less than 1 millisecond output response for excellent sensing repeatability
- Tough ABS housing is rated IEC IP67; NEMA 6
- Bright LED operating status indicators are visible from 360°
- Discrete PNP or NPN output, depending on model
- Multiple connection options available (see Models)
- Compact housing, easy barrel-mount (some models) or side-mount installation

Models

Sensing Mode	Model*	Range	Output Type
Polarized Retro	Visible Red 660 nm  POLAR RETRO	3.5 m (12")**	NPN
	QS18EN6LP		PNP
Diffuse	Infrared 940 nm  DIFFUSE	800 mm (31.5")	NPN
	QS18EP6D	500 mm (19.7")	PNP
	QS18EN6DB		NPN
	QS18EP6DB	300 mm (11.8")	PNP
	QS18EN6W		NPN
	QS18EP6W	600 mm (23.6")	PNP
	Visible Red 660 nm  DIFFUSE		NPN
	QS18EN6DV		PNP

** Specified using BRT-84 reflector (sold separately).

Sensing Mode	Model*	Range	Output Type
Convergent	Visible Red 660 nm  CONVERGENT	16 mm (0.65")	NPN
	QS18EN6CV15	43 mm (1.7")	PNP
	QS18EP6CV15		NPN
	QS18EN6CV45	43 mm (1.7")	PNP
	QS18EP6CV45		NPN
Fiber Optic – Plastic	Visible Red 660 nm  PLASTIC FIBER	Range varies by sensing mode and fiber optics used	NPN
	QS18EN6FP		PNP

* Only standard 2 m (6.5') cable models are listed. For 9 m (30') cable, add suffix "W/30" to the model number (e.g., **QS18EN6FP W/30**). A model with a QD connector requires a mating cordset; see page 7.

QD models:

- For 4-pin 150 mm (6") Euro-style pigtail, add suffix "Q5" (e.g., **QS18EN6FPQ5**).
- For 4-pin 150 mm (6") Pico-style pigtail, add suffix "Q" (e.g., **QS18EN6FPQ**).
- For 4-pin Integral Euro-style QD, add suffix "Q8" (e.g., **QS18EN6FPQ8**).
- For 4-pin Integral Pico-style QD, add suffix "Q7" (e.g., **QS18EN6FPQ7**).

WARNING . . . Not To Be Used for Personnel Protection

Never use these products as sensing devices for personnel protection. Doing so could lead to serious injury or death.

These sensors do NOT include the self-checking redundant circuitry necessary to allow their use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition. Consult your current Banner Safety Products catalog for safety products which meet OSHA, ANSI and IEC standards for personnel protection.

WORLD-BEAM® QS18E Series

Overview

The QS18 *Expert* family of sensors provides high-performance sensing in a compact package. The sensors feature a discrete output (NPN or PNP, depending on model), two bright LEDs for easy status monitoring during configuration and operation, multiple configuration options, remote configuration, and security lockout options.

Sensor Configuration

The sensor can be configured via any of five TEACH or SET options (by push button or the remote wire) to define the sensing limits. Then a SETUP procedure may be used to enable a 30 ms OFF-delay or to change the Light-/Dark-Operate setting (see page 5). Sensing limit configuration options include:

- Static TEACH: one switching threshold, determined by two taught conditions
- Dynamic (on-the-fly) TEACH: one switching threshold, determined by multiple sampled conditions
- Light SET and Dark SET: one switching threshold, offset from a single sensing condition (the “dark” condition or the “light” condition; see Figure 2)
- Window SET: a sensing window, centered around a single sensing condition

The sensor’s output is disabled during all TEACH and SET procedures, and is enabled upon return to RUN mode.

Following any TEACH or SET procedure other than Static TEACH, the Output ON condition (Light- or Dark-Operate setting) will remain as it was last configured. To change that setting or the OFF-delay setting, see page 5.

Remote Configuration

Use the remote function to configure the sensor remotely or to disable the push button for security. Connect the white wire of the sensor to ground (0V dc), through a remote programming switch. Pulse the remote line according to the diagrams in the configuration procedures. The length of the individual programming pulses is equal to the value T:

$$0.04 \text{ seconds} \leq T \leq 0.8 \text{ seconds}$$

Push Button Enable/Disable

The remote input may be used to disable the sensor push button to prevent unauthorized adjustment. Connect the white wire of the sensor as described above to perform the procedure below to either enable or disable the feature.

	Push Button	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result
Push Button Enable/Disable	• Not available	• From RUN mode, four-pulse the remote line. 	Sensor toggles between enable/disable settings and returns to RUN mode. Power LED: Flashes 3x, then ON Green Output LED: OFF,* then ON or OFF, depending on output state

* Initial Output LED condition is simultaneous with Power LED 3-flash.

Returning to RUN Mode without Saving Settings

Static TEACH and SET modes may be exited either after the automatic 60-second time-out, or by manually exiting the process: press and hold the push button (or hold the remote line low) for 2 seconds. The sensor returns to RUN mode without saving any new settings.

Figure 1. Features — fiber optic model shown

Figure 2. Dark sensing condition

Figure 3. Static TEACH (Light Operate shown)

Static TEACH

- Locates a single switching threshold (switchpoint) at the optimal location between the two taught conditions, with the Output ON condition on one side, and the Output OFF condition on the other (see Figure 3).
- The first condition taught is the ON condition. Output ON and OFF conditions can be reversed by reversing the teach order or by changing the Light-/Dark-Operate setting in SETUP mode (see page 5).
- Recommended for applications where two conditions can be presented individually.

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result	
Access Static TEACH Mode	Press and hold push button 2–4 seconds.	No action required; sensor is ready for 1st sensing condition.	Sensor waits for 1st sensing condition. Power LED: OFF Output LED: Slow flash (1 Hz)	
Teach 1st Sensing Condition	- Present 1st sensing condition. - Click push button.	- Present 1st sensing condition. - Single-pulse remote line.	Power LED: OFF Output LED: Double-flash	
Teach 2nd Sensing Condition	- Present 2nd sensing condition. - Click push button.	- Present 2nd sensing condition. - Single-pulse remote line.	Accepted	Power LED: Flashes 3x, then ON Green Output LED: OFF Sensor returns to RUN mode with new settings.
			Not Accepted	Power LED: OFF Output LED: Slow flash (1 Hz) Sensor returns to wait state, ready for 1st sensing condition.

Figure 4. Dynamic TEACH (Light Operate shown)

Dynamic TEACH

- Teach on-the-fly during actual sensing conditions, taking multiple samples of the light and dark conditions and automatically setting the threshold at the optimum level (see Figure 4).
- Sets a single switching threshold (switchpoint).
- Output ON state (Light- or Dark-Operate setting) will remain as it was last configured. To change the Light-/Dark-Operate setting, see page 5.
- Recommended for applications where a machine or process may not be stopped for teaching.

	Push Button	Remote Line	Result	
Access Dynamic TEACH Mode	Press and hold push button > 4 seconds.	Hold remote line low (to ground) > 2 seconds.	Power LED: OFF Output LED: Quick flash (2 Hz)	
Teach Sensing Conditions	- Continue to hold push button. - Present Output ON and OFF conditions.	- Continue to hold remote line low (to ground). - Present Output ON and OFF conditions.	Power LED: OFF Output LED: Quick flash (2 Hz)	
Return to RUN Mode	Release push button.	Release remote line/switch.	Accepted	Power LED: Flashes 3x, then ON Green Output LED: OFF,* then ON or OFF, depending on output state Sensor returns to RUN mode with new settings.
			Not Accepted	Power LED: Flashes 3x, then ON Green Output LED: ON,* then ON or OFF, depending on output state Sensor returns to RUN mode without changing settings.

* Initial Output LED condition is simultaneous with Power LED 3-flash.

WORLD-BEAM® QS18E Series

Light SET

- Sets a threshold approximately 12.5% below the presented sensing condition (see Figure 5).
- Any condition darker than the threshold causes the output to change state.
- In Light-Operate mode, the presented condition is the Output ON condition. In Dark-Operate mode, the presented condition is the Output OFF condition. To change the Light-/Dark-Operate setting, see page 5.
- Recommended for applications where only one condition is known, for example a stable light background with varying darker targets, or in retroreflective applications.

Figure 5. Light SET (Light Operate shown)

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result	
Access Light SET Mode	Press and hold push button 2–4 seconds. 	Single-pulse remote line. 	Sensor waits for sensing condition.	
			Push Button Power LED: OFF Output LED: Slow flash (1 Hz)	Remote Line Power LED: OFF Output LED: Double-flash
Set Sensing Condition	- Present sensing condition. - Four-click push button. 	- Present sensing condition. - Four-pulse remote line. 	Accepted	Power LED: Flashes 3x, then ON Green Output LED: OFF,* then ON or OFF, depending on output state Sensor returns to RUN mode with new settings.
			Not Accepted	Power LED: OFF Output LED: Slow flash (1 Hz) Sensor returns to wait state, ready for sensing condition.

Dark SET

- Sets a threshold approximately 12.5% above the presented sensing condition (see Figure 6).
- Any condition lighter than the threshold causes the output to change state.
- In Light-Operate mode, the presented condition is the Output OFF condition. In Dark-Operate mode, the presented condition is the Output ON condition. To change the Light-/Dark-Operate setting, see page 5.
- Recommended for applications where only one condition is known, for example a stable dark background with varying lighter targets, or when maximum excess gain is required.

Figure 6. Dark SET (Light Operate shown)

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result	
Access Dark SET Mode	Press and hold push button 2–4 seconds. 	Single-pulse remote line. 	Sensor waits for sensing condition.	
			Push Button Power LED: OFF Output LED: Slow flash (1 Hz)	Remote Line Power LED: OFF Output LED: Double-flash
Set Sensing Condition	- Present sensing condition. - Five-click push button. 	- Present sensing condition. - Five-pulse remote line. 	Accepted	Power LED: Flashes 3x, then ON Green Output LED: OFF,* then ON or OFF, depending on output state Sensor returns to RUN mode with new settings.
			Not Accepted	Power LED: OFF Output LED: Slow flash (1 Hz) Sensor returns to wait state, ready for sensing condition.

* Initial Output LED condition is simultaneous with Power LED 3-flash.

Figure 7. Window SET (Light Operate shown)

Window SET

- Single ON condition window extends approximately 12.5% above and below the presented condition when Light Operate is selected (see Figure 7). Output ON and OFF conditions can be reversed by changing the Light-/Dark-Operate setting (see below).
- Lighter or darker conditions ("outside" the window) cause the output to change state.
- Recommended for applications where the target to be sensed may not always appear in the same place, or when other unwanted signals may appear.

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result	
Access Window SET Mode	• Press and hold push button 2–4 seconds. 	• Single-pulse remote line. 	Sensor waits for sensing condition.	
			Push Button Power LED: OFF Output LED: Slow flash (1 Hz)	Remote Line Power LED: OFF Output LED: Double-flash
Set Sensing Condition	• Present sensing condition. • Double-click push button. 	• Present sensing condition. • Double-pulse remote line. 	Accepted Power LED: Flashes 3x, then ON Green Output LED: OFF,* then ON or OFF, depending on output state Sensor returns to RUN mode with new settings.	
			Not Accepted Power LED: OFF Output LED: Slow flash (1 Hz) Sensor returns to wait state, ready for sensing condition.	

Sensor SETUP

Access SETUP functions directly from RUN mode, using the procedures detailed below.

30 ms OFF-Delay (Pulse Stretcher) Enable/Disable

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result
OFF-Delay Enable/Disable	• From RUN mode, six-click the push button. 	• From RUN mode, six-pulse remote line. 	Sensor toggles between enable/disable settings and returns to RUN mode. Power LED: Flashes 3x, then ON Green Output LED: Enabled – ON,* Disabled – OFF,* Then ON or OFF, depending on output state

Light-Operate/Dark-Operate Select

	Push Button 0.04 seconds ≤ "Click" ≤ 0.8 seconds	Remote Line 0.04 seconds ≤ T ≤ 0.8 seconds	Result
Light-/Dark-Operate Select	• From RUN mode, seven-click the push button. 	• From RUN mode, seven-pulse remote line. 	Sensor toggles between Light-/Dark-Operate settings and returns to RUN mode. Power LED: Flashes 3x, then ON Green Output LED: Light Operate – ON,* Dark Operate – OFF,* Then ON or OFF, depending on output state

* Initial Output LED condition is simultaneous with Power LED 3-flash.

Performance Curves

Performance using Dark SET, performed in no-light condition. Diffuse-mode performance based on use of 90% reflectance white test card.

Dimensions

Model suffix: LP, D, CV15, CV45, DV

Model suffix: DB, W

Model suffix: FP

Model suffix: Q
(e.g., QS18EN6LPQ)

Model suffix: Q5
(e.g., QS18EN6LPQ5)

Model suffix: Q7
(e.g., QS18EN6LPQ7)

Model suffix: Q8
(e.g., QS18EN6LPQ8)

Fiber Mounting

M18 x 1 Jam Nut

Packing List

Sensor
M18 jam nut (some models)
M3 hardware packet
Data sheet, P/N 136564

M3 Hardware Packet Contents:

2 – M3 x 0.5 x 20 mm SS Screw
2 – M3 x 0.5 SS-Hex Nut
2 – M3 SS Washer

Hookups

NPN (Sinking) Output Models

PNP (Sourcing) Output Models

Key
1 = Brown
2 = White
3 = Blue
4 = Black

Cabled hookups only are shown.
QD hookups are functionally identical.

Accessory Quick-Disconnect (QD) Cordsets

Style	Model	Length	Dimensions	Pinout
4-pin Euro-style straight	MQDC-406 MQDC-415 MQDC-430	2 m (6.5') 5 m (15') 9 m (30')		
4-pin Euro-style right-angle	MQDC-406RA MQDC-415RA MQDC-430RA	2 m (6.5') 5 m (15') 9 m (30')		1 = Brown 2 = White 3 = Blue 4 = Black
4-pin Pico-style straight	PKG4-2	2 m (6.5')		
4-pin Pico-style right-angle	PKW4-2	2 m (6.5')		1 = Brown 2 = White 3 = Blue 4 = Black

WORLD-BEAM® QS18E Series

Specifications

Supply Voltage and Current

10 to 30V dc (10% max. ripple) at less than 35 mA, exclusive of load
10 to 24V dc at > 55° C

Supply Protection Circuitry

Protected against reverse polarity and transient voltages

Output Configuration

Current sourcing (PNP) or current sinking (NPN), depending on model.
Light- or dark-operate selectable (see page 5).
Selectable 30 ms output OFF-delay (see page 5).

Output Rating

100 mA max.

OFF-state leakage current: less than 50µA @ 30V dc

ON-state saturation voltage: less than 1.5V (1.7V for 30' cable models)

Output Protection Circuitry

Protected against false pulse on power-up and continuous overload or short-circuit of output

Output Response Time

600 µs ON/OFF

NOTE: Momentary delay on power-up; output does not conduct during this time.

Repeatability

75 µs

Construction

ABS housing, PMMA lens

Environmental Rating

Meets NEMA 6; IEC IP67

Connections

PVC-jacketed 4-conductor 2 m (6.5') or 9 m (30') unterminated cable, or 4-pin Euro-style or 4-pin Pico-style quick-disconnect (QD), either integral or 150 mm (6") pigtail, are available. QD cordsets are ordered separately (page 7).

Operating Conditions

Temperature: -20° to +70°C (-4° to +158°F)

Max. rel. humidity: 90% at 50°C (non-condensing)

Application Notes

- If the push button does not appear to be responsive, perform the push button enable procedure (page 2).
- To maintain backwards compatibility with earlier models, 3 remote line pulses or a push button hold followed by 3 push button clicks will perform a Dark SET.

Certifications  

Accessory Reflectors and Fiber Optics

See the Accessories section of your current Banner Sensors catalog or visit www.bannerengineering.com for complete information.

Accessory Mounting Brackets

SMB312S

- 2-axis, side-mounting bracket
- Stainless steel

SMBQS18Y

- Die-cast bracket mounts into 18 mm holes
- Accommodates Euro-style QD connections

SMB4050YL

- Heavy-duty die-cast bracket designed for industrial protection
- Replaceable window
- M18 vertical mount option
- Includes nuts and lock washer

SMBQS18DIN

- 2-piece bracket mounts to 35 mm DIN rail
- 300 series stainless steel and glass-filled nylon; zinc-plated steel screw

SMB18A

- Right-angle bracket with curved mounting slot for versatile orientation
- 12-ga. stainless steel
- Clearance for M4 (#8) hardware

SMB3018SC

- 18 mm swivel barrel for side mount bracket
- Black reinforced thermoplastic polyester
- Stainless steel swivel locking hardware included

Additional available brackets:

SMB46A, SMB18SF, SMBQS18RA, SMB18FA, SMBQS18A

For bracket dimensions, visit www.bannerengineering.com.

WARRANTY: Banner Engineering Corp. warrants its products to be free from defects for one year. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture found to be defective at the time it is returned to the factory during the warranty period. This warranty does not cover damage or liability for the improper application of Banner products. This warranty is in lieu of any other warranty either expressed or implied.
